

## **ARIZONA COURTLINES, INC. SPECIFICATIONS**

### **CUB-ADJ-C (Chrome Finish) CUB-ADJ-P (Powder Coat Finish) CHIN UP BAR (HEIGHT ADJUSTABLE)**

Bar shall be designed to provide 24" of adjustment in 6" increments. Unit shall consist of a bar weldment and two heavy formed steel support channels with 1/4" thick steel wall mounting plates at each end.

Bar shall be 1" diameter solid steel rod. Formed supports shall be 1-1/2" wide x 1/4" thick steel flat bar. Formed supports shall extend the bar 18" from the wall (or mounting surface). Formed supports shall be spaced 3'-6" apart. All connections between chin up bar assembly parts shall be welded at factory with a minimum weld of 1/4 inch. Chin up bar shall be secured to support channel with locking t-handles on each side to prevent movement at all height settings. Four 1/2" diameter anchors shall secure chin up bar assembly to the wall (or mounting surface), anchors provided by installer. Specify desired maximum bar height above finish floor.

#### **CUB-ADJ-C**

Complete assembly (excluding anchors) shall have chrome plate finish.

#### **CUB-ADJ-P**

Complete assembly (excluding anchors) shall have powder coat finish.
