

ARIZONA COURTLINES, INC. SPECIFICATIONS

BR- 13 (ACI MODEL #) BIKE RACK (13 BIKE CAPACITY)

Bike rack is made from 2-3/8" diameter schedule 40 galvanized steel tubing. Steel tubing is formed in a "wave" design (Loops). Bike rack shall have (11) loops and shall be capable of storing (13) bicycles.

INSTALLATION TYPES:

Bike rack is available for in-ground or surface mount installation.

In-Ground Installation places each end of the bike rack 10-1/4" into a concrete footing (fill by installer). Anchor pins are provided to secure unit in concrete footing.

Surface Mount Installation places each end of the bike rack flush with the concrete slab. Bike rack is held in place by a steel flange, which is welded to the bottom of each end of the bike rack. Steel flange is 6" x 6" x 3/8" thick with (4) 9/16" diameter holes.

Anchor hardware is not furnished.
